

Tripartite Exercise:

Lessons Learned

Dr. Armando Mateos Poumain

Tripartite FMD Functional Exercise

Objectives

- ♦ To evaluate during an FMD outbreak
 - Veterinary Services response
 - Tripartite communication plan
 - Operation of the vaccine bank
 - Decision tree matrix for vaccine use

QTM-02/194 Manual

Tripartite FMD Functional Exercise

National Objectives

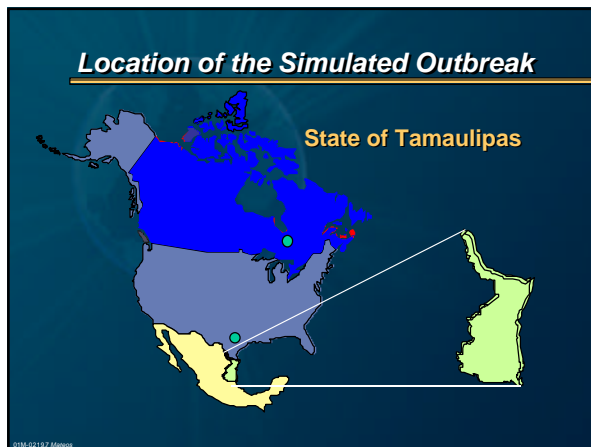

- ♦ To evaluate the response of the Mexican Animal Health Emergency Systems
- ♦ To train the staff of the emergency services of animal health on FMD control and eradication methods
- ♦ Use and revise the Mexican Emergency Plan

QTM-02/195 Manual

Tripartite FMD Functional Exercise

- ♦ The exercise was coordinated by the Mexican United States Commission to Prevent FMD and other exotic animal diseases
- ♦ 70 persons participated in the exercise from different organizations
 - Livestock Producers.
 - Federal and state agencies.
 - Ministries of Agriculture, Defense, Environment
 - International Organisms

QTM-02/196 Manual

Exercise Cronology

- Day 1
- Notification of a suspicious case of FMD in Aldama, state of Tamaulipas
- Index case
- El Laurel Ranch with 335 bovines, 12 swine, 120 ovine and 15 equine
- Precautary quarantine established and Epi investigation started

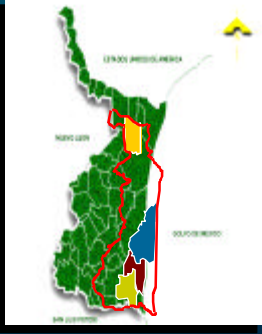

QTM-02198 Mapas

Exercise Cronology

- Day 2
- Case confirmation
- Activation of Emergency System
- Quarantine
- Movement control
- Focal and perifocal areas
- 3 new cases are detected

QTM-02199 Mapas

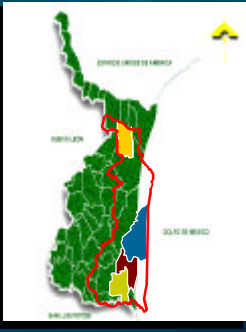

Exercise Cronology

- ♦ Day 3
- ♦ Quarantine of 13 municipalities
- ♦ Susceptible animals
Focal area: 553,556
- ♦ Perifocal: 338,308
- ♦ Day 12
- ♦ 21,775 affected animals in 477 farms
- ♦ 11,801 animals slaughtered

QTM-021910 Mazon

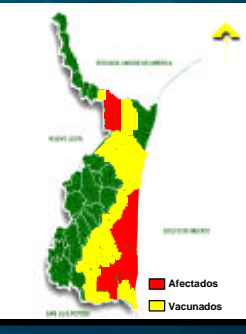

Exercise Cronology

- ♦ Day 13
- ♦ Ring vaccination started
- ♦ Day 65
- ♦ 24,601 animals affected
- ♦ 22,047 slaughtered from 483 farms
- ♦ 70 million pesos. Compensations to producers spent

QTM-021911 Mazon

Exercise Cronology

- ♦ Day 150
- ♦ 783,409 animals vaccinated
- ♦ Vaccination stopped
- ♦ Last FMD case

QTM-021912 Mazon

Exercise Cronology

- ♦ Day 170 to day 200
- ♦ Sentinelization
- ♦ Slaughter of vaccinates

After three months of having slaughtered the last vaccinate a request is made to the OIE to get the free status back

Critical Points Identified in the Emergency Response

- ♦ Reliable livestock inventories
- ♦ Reliable inventories of resources & availability for the emergency
- ♦ Availability of Emergency financial resources on time
- ♦ The need to update the Emergency Manual in the case of a FMD outbreak with the new technical developments

Critical Points Identified in the Emergency Response

- ♦ The need to incorporate the Vaccine bank protocols in the Emergency Manual
- ♦ To increase Industry participation in the emergency response
- ♦ To Increase communication between the operation staff, the epidemiological team and the decision making staff
- ♦ To include other Government Agencies
- ♦ Organisms that can help with resources in the case of an outbreak

Achievements

- ♦ Better knowledge of the tools to help in the decision making process:
 - Communication Plan
 - Decision Matrix
 - Decision Tree
 - Simulation Model
- ♦ Increase awareness of industry on the importance of being ready for an animal health emergency
- ♦ To repeat this type of exercises at different levels to be prepared in the case of an outbreak
